

Where can I have my wellwater tested in New Brunswick?

There are many laboratories in the Province that are capable of performing tests on well water. We recommend choosing a laboratory that is accredited by either SCC (Standards Council of Canada) or by CALA (Canadian Association for Laboratory Accreditation).

RPC Analytical Services laboratory is the designated Provincial Analytical Services laboratory in New Brunswick. They have offices in Fredericton and Moncton and maintain SCC accreditation.

Samples can be dropped off to their offices at the following locations:

Please call your local SNB office prior to collecting any water samples in order to verify what days they will accept them. Water samples should be fresh and collected the same day they are shipped to the lab.
