

Emergency Response Asset *Communication Support Trailer*

Date in Service: 2019

Number of Assets: 1

CAPABILITY OVERVIEW

This command post trailer enables our team to respond to a field event and to be available to other agencies to provide communications solutions that meet their needs.

The unit is self-sufficient and, when deployed, can provide the following:

- Access to disparate radio communications systems (VHF, UHF, 700 MHz P25, marine, aircraft, amateur radio, etc.)
- Enhanced response during extended outage event
- Onsite linkages of various systems to provide custom solutions to suit the needs of the response in the field
- RADCOM can also provide:
 - o Infrastructure and user radio equipment
 - o Communications support and planning
 - o Onsite equipment training
 - o Remote radio coverage solutions and enhancements as needed for field applications
 - o Data gathering and distribution
- On-board remote radio console for remote field dispatching of agencies over LTE networks.

Access to LTE, remote LAN, Wifi enhancement and Wifi Hotspot, satellite TV, satellite phone, and others.
